Composite Developments was started almost 34 years ago as a top-end manufacturer of carbon fibre tubular products and an importer/distributor of the world's leading sporting products in the fishing and hunting markets.

We are proud to be the exclusive importers and distributors of fishing brands such as C.D. Rods, Okuma rods and reels, Silstar, Savage Lures, Perfect Image, Flambeau Tackle products, Pakula Lures, Scierra Products, Tonic eyewear and CDX accessories, and of course all the fine products in this hunting catalogue.

The team here at C.D. are all actively involved in these areas of leisure, so we pride ourselves on the fact that we get out there and thoroughly test and put the products through their paces in the field so that we can better advise and sell them to the N.Z. market.

The selection of the brands in this catalogue are what we feel are the very best value for money, and we pride ourselves that we also back 100% of these products with back-up service and parts should there ever be an issue.

We are also here should you ever require further information. Please don't hesitate to give us a call and talk to our friendly Customer Services team on any matter relating to the products in this catalogue or our very comprehensive fishing catalogue. And don't forget to visit us online at www.cd rods.co.nz where you can see the full range of everything that we do here at C.D.

Good luck out there and enjoy the reason we bring these awesome products to you. And of course, take care of our precious environment at the same time.

Windham Weaponry

The Windham Weaponry Story...

A team of the finest firearms manufacturers in the U.S.A. has been re-assembled to bring to market the highest quality AR type rifle possible. These good Maine folks - most of whom are former employees of Bushmaster Firearms - offer many years of experience in the industry, and all look forward to working with you, to serving your needs, and to building you a great rifle.

When the people who bought Bushmaster in 2006 decided to move it "lock, stock and barrel" out of Maine to New York in 2011, the original Bushmaster owner, Mr. Richard Dyke was left with both a dilemma and an opportunity. Almost to the day of the 2011 move, Mr. Dyke's non-compete clause expired. He still owned the property where Bushmaster had been built, and knew all the workers - now laid off - who had helped him build it. He made a decision to "get back in the game" and promptly put an email out to many of his former employees and friends asking if there was interest in joining him for a new project.

With a resounding "yes" of support, he gathered the financing in two days, and started bringing people back into their long-time Windham manufacturing home. Phoenix-like, Windham Weaponry was on the rise. Within three months, the first production models of the new Windham Weaponry line had been perfected and delivered. Quality, fit, finish, durability, accuracy and value were all superb - giving credence to Windham Weaponry's motto "The Quality Goes In, Before The Rifle Goes Out".

DEVELOPMENT & PRODUCTION *OF HIGH-PERFORMANCE FIREARMS*

Kel-Tec CNC Industries, Inc. was founded 1991 in Cocoa , Florida. Initially a CNC machine shop making firearms components for Grendel Inc., Kel-Tec started to manufacture firearms in 1995 with the P-11. Specializing in innovative rifle designs and handguns for concealed carry by law enforcement personnel and qualified citizens, Kel-Tec is now one of the top five handgun makers in the USA, and one of the largest in the world.

Kel-Tec continues to grow and expand at their Cocoa facility thanks to their many satisfied customers. In addition to their newly expanded 30,000 sq. ft machine shop, their 6,200 sq. ft. assembly area, their 8,920 sq. ft final assembly with 50-yard indoor shooting range, and their 12,500 sq. ft. building that houses R&D, welding, and KSG assembly, they have recently renovated an additional 30,000 sq. ft facility that houses raw materials, a new finishing department, as well as a new customer/warranty center with 25-yard indoor range and showroom.

Kel-tec Shotgun

KSG

Caliber:.. 12ga 3"
Weight unloaded: 3.1kg
Length: 30 inches
Barrel length: 22.5 inches
Magazine Capacity: 6+6 (3" shells)
Trigger Pull: 5lbs

The KSG™ is no ordinary tactical shotgun.

Its dual tube magazines hold a dozen 3 inch, 12 gauge shells (plus one in the chamber), with the flexibility of switching between various projectiles.

A patented downward ejection system makes it truly ambidextrous, while its 30 inch overall length, 22.5 inch cylinder bore barrel and 3.1kg of weight make it is as compact as legally possible.

Kel-tec Rifles

SU22

Caliber: 22 LR
Weight unloaded: 1.8kg
Length: 34 inches
Barrel length: 16.1 inches
Magazine Capacity: 15 rounds
Twist: 1:16"

The SU-22 rifle is chambered for the popular and economical .22 Long Rifle cartridge (.22LR). It is based on the SU-16 rifle and shares many parts including the grip and front and rear sights.

The SU-22 is not a simple conversion kit, it is a standalone firearm chambered for the .22LR and is designed for target shooting, plinking, or small game hunting.

The SU-22 operates by blowback action and has a 4140 steel bolt that rides on steel guide rails inside the polymer receiver. The ejector is attached to one of the guide rails and the recoil spring is located above the barrel. The cross-bolt safety and magazine release operate identically to the SU-16.

The rear sight is adjustable for windage and the front sight is adjustable for elevation. An integrated picatinny rail on top will accept a multitude of sighting options. The muzzle end of the barrel is threaded 1/2"-28 to accept standard attachments such as a sound moderator. A 15 round semi-transparent magazine is included.

Code	Product
KTSU22LR	Kel-tec 22LR Threaded Rifle with 15 Round Magazine

SU16A

Caliber: .223 Rem
Weight unloaded: 2.3kg
Length: 37.4 inches
Barrel length: 18.5 inches
Magazine Capacity: 5 rounds (included 2 x 5 round magazines)
Twist: 1:9"

The SU-16 is a gas operated, semi-loading rifle chambered in .223 caliber. It is intended to be the perfect everyman's sport and utility rifle. The rifling is 1 turn in 9 inches, right hand twist. Several unique features make the SU-16 a versatile sporting firearm, including:

- Chrome lined bore and chamber.
- An integrated Picatinny rail for mounting different sight systems.
- The fore-end folds down to form a bipod for increased accuracy.
- The stock can store two spare magazines.
- The rifle can be folded but when facilitated it renders the rifle totally inactive and unable to be fired as the trigger mechanism folds out with the stock. This is intended to allow easy storage.

The SU-16 has a conventional, long-stroke gas-piston operation and utilizes the proven Johnson/Stoner breech locking system. The reciprocating bolt handle and magazine catch are on the right side, while the push bolt safety can be changed to work from either side. Except for barrel and operating components, the SU-16 is made entirely of high impact reinforced polymer.

ActionSportGames is a worldwide leader in the business of replica firearms and accessories manufacturing – including Airsoft guns, Airguns, CO₂ guns and firearms replicas. We specialize in 1:1 scale replica guns and accessories for fun, action, sports, entertainment and collection. The assortment consists mainly of licensed models and exclusive sub-brands of ActionSportGames. ActionSportGames was founded in April 2003 as a merger of the two largest Danish distributors of Airsoft guns and accessories. One of our goals is to become the preferred supplier in the firearms replica business through worldwide license agreements, quality brands and premium service.

Ctn. Size: 16.75x11.5x7.5; Packed: 6/ctn.
Ship Wt.: 11.8 lb.

Floating decoy Bag

The floating decoy bag is perfect! Big comfy padded shoulder pads do not allow the straps to dig into your shoulders. The length of the bag is NOT such that it smacks you in the back of the legs everytime you take a step. It quickly drains water and it's extremely durable. Oh... and you can fit 3 dozen decoys in it.
